The Chemistry division of the laboratory is equipped with best of analytical equipments available internationally to carry out both physical and chemical analysis of all food and water samples as per national and international food regulations.

Types of tests carried out

Tests for detecting ppb levels of micro-contaminants like pesticide residues, mycotoxins, biotoxins, fumigants, polychlorobiphenyls, pentachlorophenols, heavy metals, antibiotic residues and aflatoxins.

Tests prescribed by Agmark, Bureau of Indian Standards, Food Safety and Standards Authority of India (FSSAI), United States Food and Drug Administration (USFDA) and European Union Standards.
