CIRCULAR

Ref: P4/2411/2020-21

Date : ...6/7/2020..

Mentoring

The college has an effective tutorial and mentoring system in all departments. The HoD's are requested to prepare and submit a mentor-mentee list of their departments on or before 15th July 2020 for the academic year 2020-2021.

Mentors are requested to maintain a mentoring record of their mentees. The format of the record is being attached herewith. The mentors should consider the following guidelines with regard to mentoring.

- Identify the strengths and weaknesses of mentees
- To enable the mentees to overcome their weaknesses and motivate them in the right direction
- To make the mentees aware of the opportunity provided by the institutions for their advanced learning and growth
- Encourage the mentees to participate in the co-curricular and extra-curricular activities and help them to identify their talents
- Advice your mentees on personal, emotional, academic and career related issues.
- Encourage them to participate in student exchange; internship and field visit
- Maintain a confidential record of the mentees.

Mentoring system 2020-2021

The college has an effective mentoring system in all departments. The mentoring system in our college supplements the tutorial system. The college maintains a good mentor-mentee ratio. The difficulties and problems faced by students are well followed up by the class tutors itself. The tutorial sessions and personal interactions of class teachers with the students help to identify their issues and are resolved immediately. The entire academic and stress related issues are solved in the department level itself. The holistic developments of students are ensured by class teachers. Hence no issues have been raised in the mentoring system.

A handwritten signature in blue ink, appearing to be "Prasanna".

CHAPTER 9 Statistical Physics

- underpins thermodynamics, ideal gas (a classical physics model), ensembles of molecules, solids, liquids ... the universe
- 9.1 Justification for its need !
- 9.2 Classical distribution functions as examples of distributions of velocity and velocity² in ideal gas
- 9.3 Equipartition Theorem
- 9.4 Maxwell Speed Distribution
- 9.5 Classical and Quantum Statistics – when do we need to use them (can't get away with the classical distribution?)
- 9.6 Bose-Einstein statistics: Black body radiation, Liquid Helium, Bose-Einstein condensates
- 9.7 Fermi-Dirac Statistics

Ludwig Boltzmann, who spent much of his life studying statistical mechanics, died in 1906 by his own hand. Paul Ehrenfest, carrying on his work, died similarly in 1933. Now it is our turn to study statistical mechanics. Perhaps it will be wise to approach the subject cautiously.

— David L. Goldstein (States of Matter, Mineola, New York: Dover, 1985)

**International Webinar Series
on Material Science
Organised by Post Graduate
Department of Physics in
association with IQAC**

**On 7th August
2020 at 10.30 am**

Dear Sir/Madam,

We have great pleasure to inform you that the Post Graduate Department of Physics, S. N College, Sivagiri, Varkala, Kerala is organising International Webinar series on Material Science. The main objective of this webinar series is to bring together the experts in this field, research scholars, teachers and students in a single platform to share their knowledge and ideas during this pandemic period of COVID -19. We invite Faculty members, Research Scholars, MPhil students, interested Post Graduate and Under graduate

**Dr Aranya S
HOD**

**Dr.K.C
Preetha**

**Sajesh Sasidharan
Ramesh Chandran B
R**

About Our College

Sree Narayana College, Sivagiri, Varkala was founded in 1964 in memory of the great social reformer Sree Narayana Guru, who believed in “Liberation Through Education and Strength through Organisation”. The college, managed by the S.N Trusts, Kollam, is accredited by NAAC with B grade. It is one of the leading institutions in the state. The Post Graduate Department of Physics has been offering BSc Physics since 1967 and MSc Physics since 1995. Many eminent Professors and teachers

About the Topic

Supercapacitors have attracted significant research interest attributable to their exceptional properties such as ultrahigh power densities, outstanding rate capabilities, and remarkable safety standards, making these devices a highly desirable contender for adoption as energy storage device to fill the gap between electrostatic capacitors and electrochemical batteries. Supercapacitors as high energy storage device with specified properties has a potential to contribute toward rapid growth of low power electronics, high power reliant military applications and other wider commercial applications

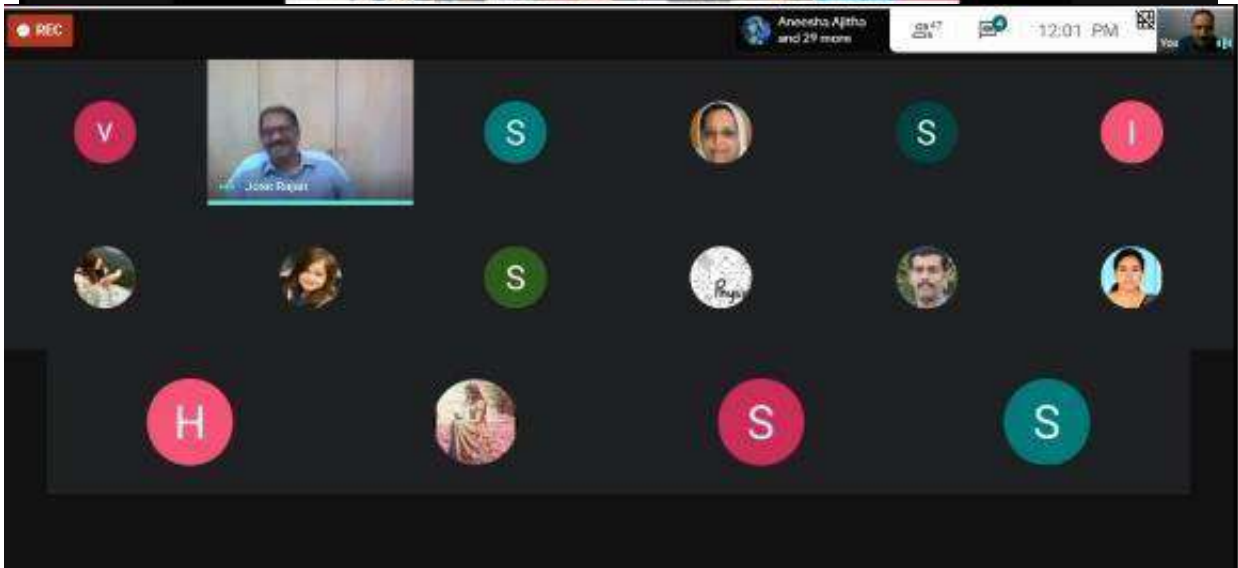

International Webinar Series: 1

“2D materials as supercapacitor electrodes

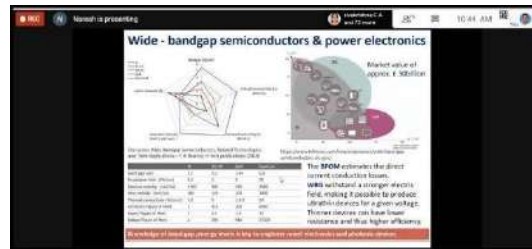

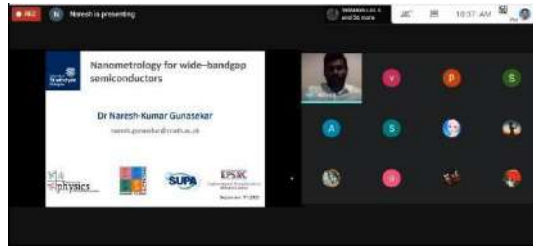

Lecture 2: 10.09.2020 :
“ Energy Generation and Storage by Fibers”

Lecture 3: 11.09.2020 :

“ Nanometrology for wide-bandgap Semiconducto

TRENDZ 2020-2021
